

HOBHO

HOBOHO COIN REDPAPER

I.

HobohoCoin is an an ERC-20 token powered by the Ethereum blockchain. It has a total, supply of 100 million HeebieJebies (HGBG). Hobohocoin can be spent and traded like any other cryptocurrency and can be held at any Ethereum address.

II.

Anyone can “mine” HobohoCoin by petitioning the Hobohogoblin to send them some. The portal for petitioning the Hobohogoblin is located at <https://hobohocoin.com/petition.html>.

III.

Requests for HobohoCoin will be evaluated until the Great Reserve is fully distributed.

IV.

Only one request may be made, ever, per email address/Ethereum address combination.

V.

Request must include an explanation for why the Hobohogoblin should send HobohoCoins to the specified address. Empty requests will be discarded.

VI.

There are no guidelines for requests. Petitioners may argue in favor of receiving HobohoCoins using whatever approach they favor, and on whatever grounds they see fit.

VII.

Requests that appeal to the Hobohogoblin will result in a transaction of HeebieJeebies (HBGB) to the address specified. Requests that fail to move the Hobohogoblin will result in nothing.

VIII.

All decisions are final. There is no avenue for appeal.

IX.

The allocation of the Total Supply is as follows.

PURPOSE	ALLOCATION	HBGB
The Great Reserve	65%	65 Million
HobohoCoin Partner Distribution Program (HPDP)	20%	20 Million
The Hobohogoblin's Reserve	15%	15 Million

The Great Reserve

The Great Reserve is the river from which the joy of HobohoCoin flows for all. One day it will be empty.

HobohoCoin Partner Distribution Program (HPDP)

Reserved for select partners to distribute or utilize under terms and conditions set in the HPDP Agreement.

The Hobohogoblin's Reserve

The Hobohogoblin's cache of HeebieJeebies is a private reserve that will be distributed to Goblin Helpers, external vendors, promotional partners, and other entities that provide help of some kind.

X.

Circulation statistics will be published at regular intervals. HobohoCoin is considered “in circulation” once it has left the contract address. Alternatively, anyone may calculate the exact amount of HobohoCoin in circulation using Etherscan.io to get the balance of the contract wallet.

XI.

Once all Hobohocoin has been distributed, the Hobohogoblin will retire. No more HeebieJeebies will be minted, and HobohoCoin will be available only through private exchange and public marketplaces.

XII.

Any resemblance to any cryptocurrency or token, active or abandoned, is entirely coincidental.

XIII.

Bankers suck. Let's wreck them.
